In accordance with VDI guidelines 2198, this specification sheet applies to the standard model only.  
For special masts, attachments etc. specifications may vary.

					STILL	STILL	
Description	1.1	Manufacturer					
	1.2	Manufacturer's model designation			FM-X 10	FM-X 12	
	1.3	Drive (electric, diesel, petrol, LPG)			Electric	Electric	
	1.4	Operation (hand, pedestrian, stand-on, rider seated)			Seat	Seat	
	1.5	Load capacity	Q	kg	1000	1200	
	1.6	Load centre	c	mm	600	600	
	1.8	Load distance <sup>1)</sup>	x	mm	239	311	
	1.9	Wheel base	y	mm	1237	1309	
	Weights	2.1	Tare weight incl. battery		kg	2872	2889
2.3		Axle load closed fork, without load, drive side/load side		kg	1806/1066	1863/1026	
2.4		Axle load extended fork, with load, drive side/load side		kg	735/3137	664/3425	
2.5		Axle load closed fork, with load, drive side/load side		kg	1483/2389	1563/2526	
Wheels   track		3.1	Tyres (solid rubber, Polyurethane, air)			Polyurethane	Polyurethane
	3.2	Tyre size drive side		mm	360x130	360x130	
	3.3	Tyre size load side		mm	310x102	310x102	
	3.5	Wheels, number (x = driven) load side/drive side			2/1 x	2/1 x	
	3.6	Track width, load side	b <sub>10</sub>	mm	1140	1140	
	3.7	Track width, drive side	b <sub>11</sub>	mm	-	-	
	Basic dimensions	4.1	Mast/fork carriage tilt, forward/backward <sup>3)</sup>		°	1/3	1/3
4.2		Closed mast height	h <sub>1</sub>	mm	2450	2450	
4.3		Free lift	h <sub>2</sub>	mm	1890	1890	
4.4		Lift	h <sub>3</sub>	mm	5750	5750	
4.5		Extended mast height	h <sub>4</sub>	mm	6310	6310	
4.7		Height over OHG (cabin)	h <sub>6</sub>	mm	2200	2200	
4.8		Height of seat/stand	h <sub>7</sub>	mm	1050/550	1050/550	
4.10		Height of straddle legs/load wheel covers	h <sub>8</sub>	mm	330	330	
4.19		Overall length <sup>2)</sup>	l <sub>1</sub>	mm	2379	2379	
4.20		Length incl. fork back <sup>2)</sup>	l <sub>2</sub>	mm	1229	1229	
4.21		Overall width	b <sub>1</sub> /b <sub>2</sub>	mm	1250/1220	1250/1220	
4.22		Dimension of fork teeth	s/e/l	mm	40/80/1150	40/100/1150	
4.23		Fork carriage DIN 15173, class/form A, B			2/A	2/A	
4.24		Width of fork carriage, top/bottom	b <sub>3</sub>	mm	850/730 GN/SS 850/650	850/730 GN/SS 850/650	
4.25		Outer fork width	b <sub>5</sub>	mm	600	620	
4.26		Width between straddle legs/load platform	b <sub>4</sub>	mm	920	920	
4.28		Forward shift <sup>1)</sup>	l <sub>4</sub>	mm	458	530	
4.31		Floor clearance beneath mast with load	m <sub>1</sub>	mm	90	90	
4.32		Floor clearance at centre of wheel base	m <sub>2</sub>	mm	81	81	
4.33		Width of working aisle for 1000 x 1200 pallets crosswise <sup>2)</sup>	A <sub>st</sub>	mm	2638	2654	
4.34	Width of working aisle for 800 x 1200 pallets lengthwise <sup>2)</sup>	A <sub>st</sub>	mm	2709	2715		
4.35	Turning radius	W <sub>a</sub>	mm	1468	1540		
4.37	Length incl. load wheels	l <sub>7</sub>	mm	1641	1713		
Performance	5.1	Driving speed with/without load		km/h	12/12	14/14	
	5.2	Lift speed with/without load		m/s	0.47/0.70	0.45/0.70	
	5.3	Lowering speed with/without load		m/s	0.56/0.50	0.56/0.50	
	5.4	Shift speed with/without load <sup>4)</sup>		m/s	0.15	0.15	
	5.7	Climbing capacity with/without load		%	10/15	10/15	
	5.8	Max. climbing capacity with/without load		%	15/20	15/20	
	5.9	Acceleration time with/without load (over 10 m)		s	4.8/4.5	4.9/4.6	
	5.10	Operation brake			gen./hydr.,mech.	gen./hydr.,mech.	
	Electric motors	6.1	Drive motor, S2 performance 60 min		kW	6.5	6.5
		6.2	Lift motor, S3 performance 15%		kW	13	13
6.3		Battery according to IEC 254-2; A,B,C, no			IEC 254-2, C	IEC 254-2, C	
6.4		Battery voltage, nominal capacity K <sub>5</sub>		V/Ah	420	420	
6.5		Weight of battery +/- 5% (depending on the manufacturer)		Kg	750	750	
6.6		Power consumption according to VDI cycle		kWh/h			
Other	8.1	Type of steering control			Three-phase	Three-phase	
	8.2	Operating pressure for attachments		bar	140	140	
	8.3	Oil quantity for attachments		l/min	18	18	
	8.4	Noise level at driver's ear		dB(A)	68	68	

All measurements including sideshift mast or sidshift forks (carriage)

<sup>1)</sup> Reduced in steps of 72 mm depending on the size of the battery.

<sup>2)</sup> A<sub>st</sub> extended in steps of 72 mm depending on the size of battery.

<sup>3)</sup> May vary according to the mast, with side shift/fork tilt 2°/4°.

<sup>4)</sup> Shift speed 0.13 m/s for closed mast heights h<sub>1</sub> = 3,600 mm and above.

## Driver's compartment.

- Spacious driver's compartment with adjustable controls. The driver is always inside the contour of the vehicle for maximum safety.
- Damped driver's compartment (optional) reduces shocks from uneven floors and therefore the likelihood of back injuries.
- Proportional adjustment of seat and footplate (optional), electrically controlled. Ergonomic control layout ensures an optimum all-round view regardless of the driver's physique.
- Comfortable, tilting seat with multiple adjustment to suit individual drivers, plus tilting mast, enable a good view of the load while reducing the potential for neck injuries.
- Open access steps allow easy entry and exit.
- Large individual storage compartments, DIN A4 document compartment, bottle holder.
- Overhead guard designed for 360° visibility and maximum safety.

## Controls.

- Ergonomic joystick allows operation of all hydraulic movements without changing grip; integrated buttons control auxiliary hydraulics; stick weighted to enable the driver to "feel" the driving direction; all movements can be operated simultaneously; maintenance-free sensor technology.
- Optional 4-lever control of hydraulic functions.
- Full electric 360° steering (optional 180°) for smooth, precise positioning. The number of revolutions for a 360° steering angle can be set to suit the driver or the conditions in the warehouse.
- Direct-drive safety steering system.
- Self-centring steering for stable, fatigue-free straight-line travel at all speeds.

## Drives.

- Powerful maintenance-free drives for driving, lifting and steering, with energy recovery during braking.
- Fully encapsulated AC drives, which provide powerful acceleration and regenerative braking, are protected against dust and water ingress.

## Hydraulics.

- Proportional valve technology for silent, fast and sensitive movements.
- Noise-optimised pump drive with improved efficiency.
- Automatic fork and side shift centering at the press of a button (optional). Immediate centering ensures the safe alignment of a pallet between the load wheels and horizontal positioning of the forks, especially with height pre-selection systems.
- High throughput of goods is provided by fast, safe working speeds for lifting/lowering, mast shift forwards, sideways and tilt.
- Shift measuring system allows soft and variable speed transitions.
- Single valve block and power chain with hydraulic quick-locks mean low service and maintenance costs.

## Mast.

- Triplex free view mast with free lift; special profiles with high torsion resistance. Routing chains and pipes within the contour of the cylinders allows maximum visibility through the mast.
- Standard mast side shift with free-view fork carriage. Absence of hydraulic pipes provides greater visibility and also makes for easier serviceability. The mast tilt moves the centre of gravity towards the truck.
- Optional integrated side shift with fork tilt for less movement of loads at high lift heights.
- The narrow construction of the mast allows optimum view around the load.
- End of reach damping minimises mast transition noise.

## Brake system.

- Maintenance-free regenerative braking with energy recovery and high efficiency.
- Maximum safety by 3-circuit brake system. Regenerative braking when releasing the accelerator pedal. When operating the brake pedal additional regenerative deceleration is activated. If the pedal is pressed further the hydraulic load wheel brake is actuated.
- Electromagnetic disc brake for emergency stop and parking.

## Electrical equipment.

- LCD display with automatic brightness adjustment. Clear, user-friendly display of all operating states. Indicator wizard for height pre-selection assists the driver and helps safely increase throughput when stacking and retrieving.
- Truck control with five drive programs. Driving speed, acceleration and braking characteristics can be set independently for each driving direction, and also to suit the driver or the conditions in the warehouse.
- Lift height indication, lift height pre-selection and camera systems all contribute to an efficient warehousing process and help increase the throughput of goods.
- FleetManager or PIN code system and optional keyless access provide an overview of the operation of the fleet and prevent unauthorised use of the vehicle.
- Electrical and mechanical interfaces for easy retro-fitting of warehouse administration and truck control systems.

## Battery.

- Exchange by hoist or, optionally, laterally with roller conveyor.
- High performance reserve for single and multi-shift operations due to battery capacities up to 930 Ah.
- Intelligent battery management limits the maximum current when lifting and ensures a long service life of the battery.

## Service.

- Easy removal of the covers to allow best access for service.
- Simple diagnostics and parameterisation.
- Extended diagnostics via central interface.

## Safety.

- CSC (Curve Speed Control) automatically reduces speed on bends to ensure maximum safety when being operated by inexperienced drivers or handling fragile loads.
- Optispeed system (optional) governs the lift and lower speeds to the maximum safe rate for the load weight and operating height: uncomfortable, stepped speed changes as the mast rises are done away with, the truck always operates at optimum performance, and realisable gains in productivity are achieved. Extended Optispeed packages are available which further adapt truck functions to warehouse conditions.
- The trucks are built in accordance with the EC machinery guideline 98/37/EG and are CE labelled.
- STILL is certified to ISO-9001.
